| There are two principal types of surface water rights in California. They are riparian and appropriative rights. | | | | | | | | | | | <u> </u> |
| | | | | GENERAL INFO | DRMATION PER | RTAINING TO W | ATER RIC | GHTS IN CALI | FORNIA | | |

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An <u>appropriative right</u> is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphiets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at http://www.swrcb.ca.gov"

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water user, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockponds Constructed Prior to 1969"

"Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

| A. | Name of person diverting water George Scovel |
|-----|--|
| i | Address P.O. Box 672, Gilroy, California |
| B. | Name of body of water at point of diversion Pescadero Creek |
| 1 | |
| 1 | Tributary to Pajaro River Moyable points of diversion between NE% OF SE% of Sec 2, T12S, R3F |
| C | Place of diversion SW 1/4 Section 8 , Township 12S , Range 4E , MD B&M |
| | Santa Clara County, or locate it on sketch of section grid on reverse side with regard to section lines or |
| .1 | prominent local landmarks. |
| D. | Name of worksstockwatering |
| İ | Capacity of diversion worksn/acubic feet per woond |
| | Capacity of storage reservoir gallons |
| | acresicet |
| ! | State quantity of water used each month in gallons or acre-feet Total |
| i | Year Jan. Feb. Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. Annual |
| | |
| | Minimum annual water use in recent years |
| F. | Purpose of use (what water is being used for) stockwatering |
| G. | General description or location of place of use (use sketch of section grid on reverse side if you desire) along Pescadero Creek on the Sargent Ranch |
| 11. | Year of first use as nearly as known before 1954 |
| ı. | Name of person filing statement Stanley S. Skeehan |
| | Position Organization water right consultant |
| 1 | Addres 210 16th Avenue, Santa_Cruz, Ca 95062 |
| ! « | estely that the foregoing statements are true and correct to the best of my knowledge and helicit. |
